Foreword

The Canadian Transportation Research Forum was established in 1966 and its members consists of a broadly based group of transportation professionals with an interest in research and informed opinion on public policy.

In furtherance of this interest, the Canadian Transportation Research Forum sponsors a national conference in Canada every year. At this conference, invited speakers present their views together with their research papers. These research papers are discussed by the panel and the participating audience. The best papers are presented cash prizes to reward the outstanding work of the researchers and all the papers are published as part of the proceedings.

These proceedings have resulted in the accumulation of numerous volumes over the years, making it difficult for researchers to easily access the subject matter of their interests. To facilitate the task of researchers, it was decided to assemble these volumes in the form of a Bibliography of Canadian Transportation Research Forum Proceedings for the period 1983-2019. The initial year was chosen as 1983 as it was the first year in which the Canadian Transportation Research Forum printed its research papers.

This Bibliography consists of three basic parts. The first part is a listing of papers by subject. The second part is a listing as it appears in each volume of the annual proceedings. The final part consists of an index of authors. In addition, a fairly large table of contents is presented initially to shorten the search process for various topics of interest.

This undertaking would not have been possible without the encouragement of the Canadian Transportation Research Forum. In addition, the help and assistance of a number of members of the Board of Directors have to be specifically acknowledged. The four individuals who deserve special mention are **Mr. Lloyd L. Ash, Ms. Gail R. Sparks, Gerry Kolaitis and Carole Ann Woudsma.**

I would also like to *specially* thank **Prof. Barry Prentice** who helped in conversion of part of this 2023 Bibliography into a PDF file. As the file ages, the machine has a mind of its own in converting Word to PDF files.

It is hoped that this 2023 volume will be of assistance to the numerous researchers in transportation. Any shortcomings of this volume are solely the responsibility of the authors. Should anyone have any suggestions on how this volume can be improved so as to be of greater use, please feel free to contact the authors. Finally, the authors would like to thank the Canadian Transportation Research Forum for publishing this volume.
